07 Version notes PG. 09

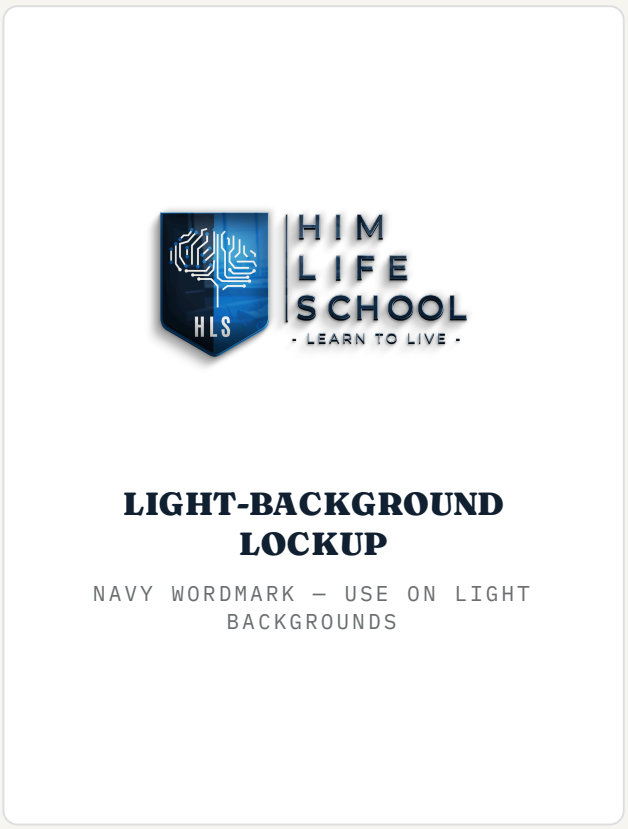

Two lockups, opposite backgrounds

Same crest, same proportions. The only difference is wordmark color, matched to whatever sits behind it.

DEFAULT LOCKUP

WHITE / CHROME WORDMARK — USE ON DARK BACKGROUNDS

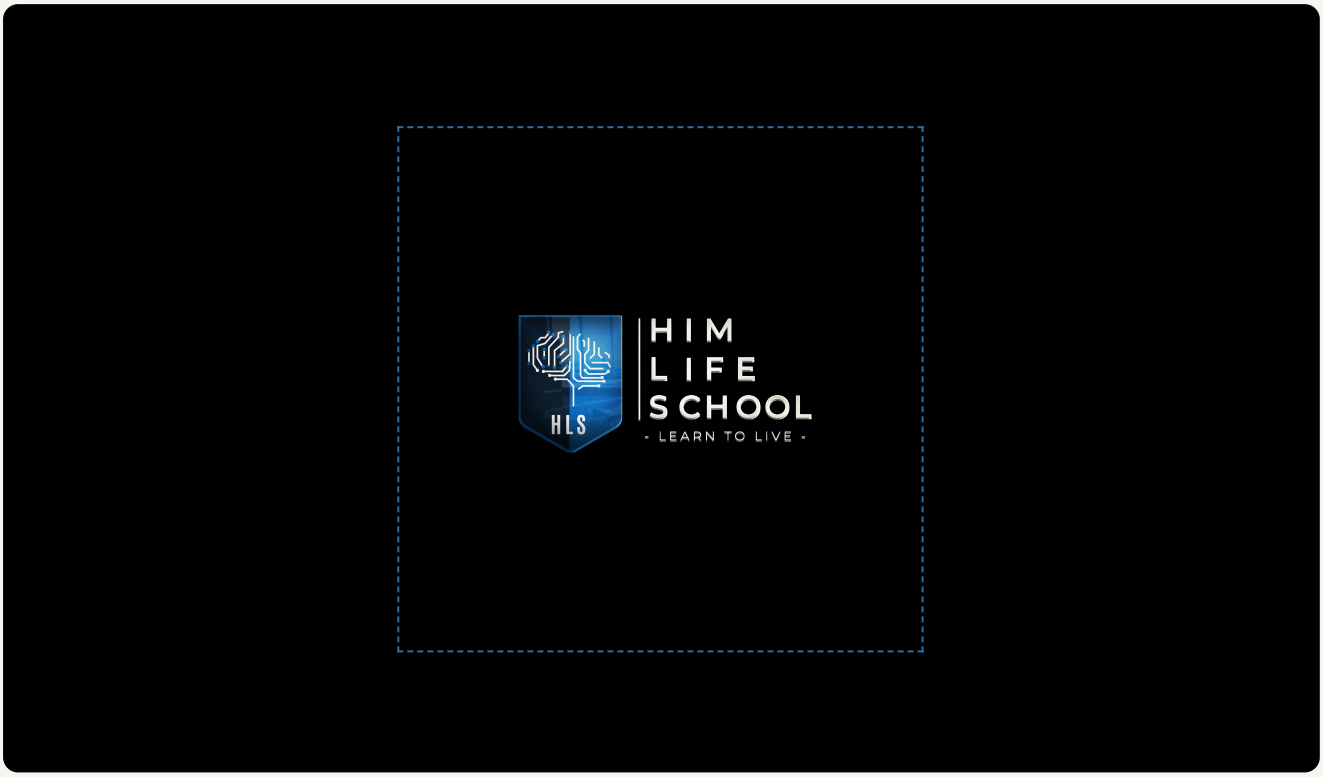

LIGHT-BACKGROUND LOCKUP

NAVY WORDMARK — USE ON LIGHT BACKGROUNDS

> Pick based on what's behind the logo, not preference. When the background is unspecified or mixed, default to the dark-background lockup.

Give the crest room to breathe

- — Clear space on all sides = the height of the "H" in HLS
- — Minimum digital width: 120px full lockup — crest alone below that
- — Minimum print width: 25mm full lockup
- — Crest alone is correct for favicons, app icons, social avatars

- × Don't recolor the crest gradient
- × Don't stretch or distort proportions
- × Don't use the wrong lockup for the background behind it
- × Don't place on busy photography without a solid panel behind it

What makes SIP different

SUBHEAD — Hanken Grotesk, Semibold, letter-spaced

CA FINAL — GROUP 1 · NOV '26 ATTEMPT

CONTENT — Hanken Grotesk, Regular

Most preparation stops at "cover the syllabus." SIP mentorship works across five distinct facets of performance — what to study, how to study, how to recall, how to present, and how to perform under pressure.

Score Improvement Program

CA Final — Group 1 · Nov '26 Attempt. A high-performance mentorship built to convert effort into marks — not another pass through the syllabus.

Version 1.0

Colors and both logo lockups sourced directly from the client-provided logo files (PNG + SVG, August 2026). Typography is System A — Fraunces, Hanken Grotesk, IBM Plex Mono — chosen for zero licensing cost and to balance the logo's technical register with a warmer, more human editorial tone.

This supersedes all earlier placeholder color/type systems used in draft materials before the logo was finalized.
